SUMMARY

Data and AI practitioner with 2.5+ years of applied research experience in national R&D programs, now building end-to-end AI services on Azure. Comfortable across the full data lifecycle — collection, cleaning, modeling, visualization, and deployment — with a track record of translating analysis into policy recommendations and shipped product features. Four peer-reviewed publications; currently pursuing an M.S. in Artificial Intelligence.

CORE SKILLS

- Data & AI: Python (Pandas, NumPy, scikit-learn), SQL, machine learning, LLM prompt engineering, MLOps
- Cloud & Deployment: Microsoft Azure (Document Intelligence, OpenAI, Cosmos DB, App Service, Static Web Apps), FastAPI, GitHub Actions CI/CD
- Analytics & Visualization: Power BI, QGIS (geospatial), Streamlit, Folium, Seaborn, Google Analytics
- Research & Communication: survey design, statistical analysis, technical writing, cross-functional collaboration, stakeholder reporting

PROFESSIONAL EXPERIENCE

Researcher — Korea Association of Persons with Physical Disabilities Jun 2023 – Dec 2025

Research Institute for Living Environment of Persons with Disabilities, Seoul

- Led government-funded R&D projects on accessible transportation, owning the full research cycle from data collection through analysis, visualization, and final reporting.
- Published four peer-reviewed journal articles as a co-author and authored multiple government research reports.

Autonomous Driving–Based Paratransit Vehicle R&D

- Collected, cleaned, and structured nationwide survey data into a queryable database supporting downstream analysis.
- Performed geospatial analysis in QGIS to identify mobility patterns among riders with disabilities.
- Recommended candidate routes for the autonomous vehicle pilot program based on the analysis, adopted into the project roadmap.

Standard Model for Intercity Low-Floor Buses

- Benchmarked domestic and international precedents and comparative indicator data to design a driver training curriculum.
- Analyzed existing legislation and drafted proposed amendments to mandate disability-awareness training for bus operators.
- Planned and ran a national public competition to promote low-floor bus accessibility.

PROJECTS

NOTO — AI-Powered Travel Expense Tracker | Backend & Cloud 2026

Microsoft AI School capstone team project · scheduled for public launch in H1 2027

- Proposed the core product concept after identifying budget tracking during travel as a shared user pain point, and led concept planning for the team.
- Built a receipt OCR and parsing module using Azure Document Intelligence and GPT-4o Vision, converting unstructured images into structured expense records.
- Integrated Azure Cosmos DB and implemented full CRUD operations for expense data.
- Developed an analytics engine producing category-level spending breakdowns, budget-overrun alerts, and daily spending trends.
- Built a FastAPI REST API server (6 endpoints) and deployed the stack via Azure App Service and Static Web Apps with a GitHub Actions CI/CD pipeline.
- Designed and operated the end-to-end data flow: extraction → transformation → storage → analysis.

Microsoft AI School team project

- Originated the initial project concept (an infrastructure-data-driven child-friendliness index) and helped steer it toward accident risk prediction through team review.
- Combined safety-infrastructure and accident records from 142 school zones across Seongnam and Gwangmyeong with ~4,000 street-view images.
- Owned model development and validation using Logistic Regression with L1/Lasso regularization, SMOTE for class imbalance, and out-of-fold cross-validation.
- Delivered results through a Streamlit and Folium dashboard, including a policy simulator estimating the impact of adding new safety facilities.

EDUCATION

M.S. in Artificial Intelligence — Ajou University

Sep 2025 – Aug 2027 (expected)

*Graduate School of Information and Communication Technology***B.A. in Vocational Rehabilitation, Minor in Law — Daegu University**

Mar 2016 – Feb 2023

PROFESSIONAL DEVELOPMENT

Google AI Professional Certificate — Coursera

Jun 2026 – Jul 2026

- Completed seven courses spanning AI fundamentals, research, content creation, data analysis, and app building.
- Built custom AI solution mini-projects using vibe-coding workflows.

Microsoft AI School, Cohort 9

Dec 2025 – Jun 2026

- Six-month intensive covering Python data analysis, data collection and preprocessing, and cloud-based machine learning and deep learning.
- Completed hands-on projects with Azure Machine Learning and Azure OpenAI.

Python for Data Analysis — Codeit

Mar 2025 – Apr 2025

- Applied data analysis coursework using Pandas, NumPy, and Seaborn.

PUBLICATIONS

- Do, Y., Park, Y., Hong, H., & Jeon, G. (2025). Development of a disability awareness training program for low-floor bus drivers. *Journal of Rehabilitation Welfare*, 29(2), 1–36.
- Do, Y., Hong, H., Park, Y., & Jeon, G. (2024). Analysis of call taxi usage behavior among people with physical and brain lesion disabilities: Focusing on Hwaseong, Gyeonggi-do. *Journal of Rehabilitation Welfare*, 28(4), 189–209.
- Do, Y., Hong, H., Park, J., & Jeon, G. (2024). Analysis of service needs of mobility-impaired passengers for a standard mid-range low-floor coach model. *Journal of Rehabilitation Welfare*, 28(2), 19–41.
- Do, Y., Hong, H., Park, J., & Jeon, G. (2023). Development of user service evaluation indicators for autonomous mobility for the transportation vulnerable: A Delphi survey of expert panels. *Journal of Rehabilitation Welfare*, 27(4), 81–103.

CERTIFICATIONS & ADDITIONAL

- Certified Rehabilitation Counselor for Persons with Disabilities, Level 1 — Ministry of Health and Welfare (2023)
- Co-author, "I Didn't Know What to Write, So I Threw In a Bit of Everything" — collaborative essay anthology with ten emerging writers (2021)
- Working Holiday, Australia (2019–2020): lifeguard and food production roles; daily English communication in an international environment
- Volunteer, Anyang Suri Sheltered Workshop (2022): designed and facilitated role-play-based social skills programming for adults with disabilities
- Languages: Korean (native), English (conversational)
